

metimur

St Bede's College Solar

“ Metimur Energy, Mamachi and Green Home Green Planet are working along side each other to deliver a 99.2kW solar system. Metimur Energy is helping the school receive VEECs through the Victorian Energy Upgrades Program, delivering \$60,000 in subsidies for the project at completion. ”

Key Challenges

- Baseline data has been affected by the school shutdowns during 2020 and 2021
- Multiple solar designs presented
- Electrical infrastructure upgrades required

Our Role

Metimur Energy is delivering a comprehensive Measurement and Verification Program which will deliver the expected subsidy for the project to St Bede's in April 2023.

Outcomes

1,221

MWh of energy saved

852

Tonnes of carbon abated

\$60k

Subsidy for the project

“ Metimur Energy provided us access to subsidies that otherwise would not have been available, assisting the customer in achieving a strong payback period and Green Home Green Planet in winning the first phase of the construction project, which will be completed in Jan 2022. ”
