

PLEDGE

CLIMATE
NEUTRAL
NOW

Ms. Patricia Espinosa
Executive Secretary
United Nations Framework Convention on Climate Change
Bonn, Germany

In joining stakeholders from around the world that have committed to help achieve the goals of the Paris Agreement, while also supporting the achievement of the United Nations' Sustainable Development Goals,

I am pleased to confirm that **Metimur Energy Pty Ltd**
(name of organization)

will contribute to accelerating the transformative change needed to reach global net-zero greenhouse gas (GHG) emissions by 2050 or earlier through its commitment to the Climate Neutral Now initiative,

therefore, will undertake the following immediate actions:

1. Quantify (measure) our greenhouse gas emissions;
2. Plan and implement actions to reduce those emissions with the goal of achieving net-zero emissions in our organization by 2050 or earlier;
3. Consider contributing to further global emission reductions and sustainable development through the use of credible carbon credits, and achieving climate neutrality now.^{1,2}

We will also communicate our efforts to contribute to achieving global climate neutrality and our participation in Climate Neutral Now, and advocate for similar action by others in our networks.

¹ Net zero is understood as an equilibrium between GHG emissions and permanent removals from the atmosphere, when required. Climate neutrality is understood as a balance between GHG emissions, reductions and offsetting through credible carbon credits. Climate neutrality is an intermediate, temporary step in the journey to achieve net zero. Note that offsetting does not replace the need to reduce emissions in parallel.

² Credible carbon credits are those issued under standards that have robust requirements to ensure additionality, permanence, third-party verification, and proper accounting systems. Also, refer to the suggested hierarchy of offsets for more information.

PLEDGE

We will also report on our immediate actions annually through the Report template and the report will be publicly available on the Climate Neutral Now website.

Metimur Energy Pty Ltd

(name of the organization)

makes this pledge starting from 09/02/2022

Sincerely,

Melbourne, Australia

9/2/2022
